Forecast for Monday 23 May 2022

Weather: Mainly dry with some low cloud to start, especially on western slopes. Low cloud will gradually lift and clear leaving dry and bright weather with sunny spells. Showers are possible from late morning, these becoming frequent and heavy during the afternoon with a risk of thunder mainly later. The risk of heavy showers will decrease into the evening, but thunder is still possible up to and beyond midnight.

Chance of cloud-free hill tops above 600m: 60% at first, mainly on western slopes, increasing to 90% by late morning with cloud covering the higher summits in showers. Becoming 60% during the evening.

Low cloud and visibility: Areas of low cloud at first with bases around 300-500m, mainly on western slopes, before lifting and breaking in the early morning. Cloud lowering to cover summits in and around heavier showers, with patches down to lower slopes, more generally during the evening. Visibility outside of cloud generally very good with distant hills visible but falling to moderate or poor in showers, and very poor in low cloud covering hills with nearby landmarks obscured.

Meteorologist's View

A day for layers – heavy showers will give sudden downpours, but in sunny spells between showers moderate UV levels are possible so sunscreen is also advisable. Wind gusts of 30 mph are possible in heavier showers.

Recent rainfall: measured at Neuadd: altitude 353m

Forecast for Tuesday 24 May 2022

Weather: A few showers are likely in the early hours and through Tuesday morning, with a risk of hail and thunder. The showers are expected to becoming more isolated to leave a mostly dry afternoon with sunny spells, although the risk of an odd thundery shower remains. It will be quite breezy though.

Maximum wind: Westerly 15-20 mph, gusting 30-35 mph.

Chance of cloud-free hill tops 600m: 40% at first, becoming 90% by late morning with cloud touching summits in heavier showers. Becoming 60% during the evening.

Low cloud and visibility: Areas of low cloud at first with bases around 300-500m, before lifting and breaking slowly through the morning. Cloud lowering to cover summits in and around heavier showers in the morning, with patches down to lower slopes. Visibility outside of cloud generally very good with distant hills visible but falling to moderate or poor in showers, and very poor in low cloud covering hills with nearby landmarks obscured.

Temperature: **Valleys:** 7C at dawn rising to 15C in the afternoon.
At 600m: Plus 5C.
Freezing level: Above summits
